# healthy living for your brain and body

## tips from the latest research

---

---

---

---

---

---

---

---

## Program overview

- Identify the reasons for taking care of yourself as you age
- List strategies to age well in the following areas:
  - Physical health and exercise
  - Diet and nutrition
  - Cognitive activity
  - Social engagement
- Make your own plan for healthy aging using the *Healthy Living for Your Brain and Body: Tips from the Latest Research* workbook

---

---

---

---

---

---

---

---

## Aging and health

- Aging well depends on your:
  - Genes
  - Environment
  - Lifestyle
- Lifestyle choices may help keep your body and brain healthy

---

---

---

---

---

---

---

---

## healthy for your brain and body

### The brain and how it works

- The brain is the control center of the body
- There are 100 billion nerve cells, or neurons, creating a branching network
- Signals traveling through the brain form memories, thoughts and feelings
- Alzheimer's disease destroys brain cells

---

---

---

---

---

---

---

---

## healthy for your brain and body

### Heart-brain connection

- Heart and brain are interrelated
  - What you do to protect your heart can also help your brain continue to operate at its best
- The brain needs blood flow
  - The brain depends on oxygen and adequate blood flow to work well
  - 25% of blood from every heartbeat goes to the brain

---

---

---

---

---

---

---

---

## healthy for your brain and body

### Dementia and Alzheimer's

- Dementia is caused by many different diseases and conditions
- It is not part of normal aging
- Alzheimer's disease is most common cause of dementia
- Known risks for Alzheimer's includes age, genetics, head injury, cardiovascular factors and fewer years of formal education
- Therapies for Alzheimer's can treat symptoms, but cannot cure, prevent or even slow disease progression

---

---

---

---

---

---

---

---

## Taking care of yourself as you age

---

---

---

---

---

---

---

---

## Physical health and exercise

8

alzheimer's association

---

---

---

---

---

---

---

---

## Physical health and exercise

### What we know

- Cardiovascular activity may reduce your risk of cognitive decline
- Regular and vigorous exercise leads to increased blood flow – other physical activities may also yield benefits
- There is no single recipe

9

alzheimer's association

---

---

---

---

---

---

---

---

Woodley discusses developing exercise as a habit in his life.

10

---

---

---

---

---

---

---

---

---

---

### Physical health and exercise

**What we can do**

- Do something you like
- Start out small
- Move safely
- Get your heart rate up
- Ask friends to join you
- Check with your doctor before you start

alzheimer's association

11

---

---

---

---

---

---

---

---

---

---

### Physical health and exercise

**What we can do**

- Stop smoking
- Avoid excess alcohol
- Get adequate sleep
- Avoid head injury
- Manage stress
- Treat depression
- Visit your doctor regularly

alzheimer's association

12

---

---

---

---

---

---

---

---

---

---

## Physical health and exercise

### What we can do

Monitor numbers and take action

- Blood pressure
- Blood sugar
- Weight
- Cholesterol

13

alzheimer's association

---

---

---

---

---

---

---

---

## Diet and nutrition

14

alzheimer's association

---

---

---

---

---

---

---

---

## Diet and nutrition

### What we know

- What's good for the heart may also be good for the brain
- Nutritious food is fuel for the brain
- Following some dietary guidelines can reduce your risk of heart disease, cancer, Parkinson's disease, Alzheimer's disease, stroke and diabetes

alzheimer's association

---

---

---

---

---

---

---

---

### Diet and nutrition

healthy living for your brain and body

**What we can do**

- Consult reputable sources about:
  - Dietary supplements
  - Vitamins
- Work with your doctor

---

---

---

---

---

---

---

---

healthy living for your brain and body

### Cognitive activity

19 alzheimer's association

---

---

---

---

---

---

---

---

healthy living for your brain and body

### Cognitive activity

**What we know**

- Keeping your mind active forms new connections among brain cells
- Cognitive activity encourages blood flow to the brain
- Mentally stimulating activities may possibly maintain or even improve cognition
- Engaging in formal education will keep your brain healthy and can provide protection against developing dementia

---

---

---

---

---

---

---

---

David Bennett, MD, is the Director of the Rush Alzheimer's Disease Center in Chicago.

21 alzheimer's association

---

---

---

---

---

---

---

---

## healthy for your brain and body Cognitive activity

### What we can do

- Read books and articles that challenge and inspire you
- Complete puzzles and play games that are challenging for you
- Learn new skills or hobbies
- Engage in ongoing learning

22

---

---

---

---

---

---

---

---

## healthy for your brain and body Social engagement

23

---

---

---

---

---

---

---

---

## healthy for your brain and body Social engagement

### What we know

- Social engagement is associated with living longer with fewer disabilities
- Staying engaged in the community offers you an opportunity to maintain your skills
- Remaining both socially and mentally active may support brain health and possibly delay the onset of dementia

24

---

---

---

---

---

---

---

---

## healthy living for your brain and body

### Social engagement

#### What we can do

- Visit with friends and family
- Engage with others
- Stay involved in the community
- Volunteer outside the home
- Join a group or club

25

alzheimer's association

---

---

---

---

---

---

---

---

## healthy living for your brain and body

### Putting all four pieces together

#### Take care of your health

- Get moving
- Eat right
- Keep your mind active
- Stay connected with others

Combine all four to achieve maximum benefits

27

---

---

---

---

---

---

---

---

## What you can do NOW

- Begin today
- Start small and build
- Do what you enjoy and stick with it
- Make healthy choices
- Make a plan
- Get support from others
- Have fun

28

alzheimer's association

---

---

---

---

---

---

---

---

## Be a savvy consumer

- If it's too good to be true – it's probably *not* true!
- Be cautious when you hear huge promises or reports of miracle cures
- Do thorough research
- Consult trusted, reputable professionals
  - Your doctor
  - Your local pharmacist
  - The Alzheimer's Association
